\* The data provided is the number of Unemployment Insurance (UI) claims that have exhausted. The data is representative of those claims that were processed during the month and does not necessarily represent the month the final payment was made in. For example, if a claimant is entitled to benefits for the week-ending October 31, 2009, the claim might not get processed until early November and that count would display in the November data. There are a small percentage of claimants that could go back onto a training extension even after exhausting their FED-ED claim.

\* The data by county represents the mailing address given by the claimant at the time of filing for UI. It is possible that an individual can reside in a different county than their mailing address. Also, this information does not represent the county where the individual worked. It is also possible that a claimant could have moved or changed their mailing address after filing for UI which would not be reflected here. Data for claimants residing outside of California but collecting benefits are not included in these figures nor are invalid addresses in California where a county cannot be determined.

\* Data includes the regular UI program and the federal extended benefit programs. The Federal extended benefit programs are:

- \* Emergency Unemployment Compensation (EUC) Tier 1 - California began paying benefits in July 2008.
- \* Emergency Unemployment Compensation (EUC) Tier 2 - California began paying benefits in January 2009, payments retroactive to November 2008.
- \* Emergency Unemployment Compensation (EUC) Tier 3 - California began paying benefits in December 2009, payments retroactive to November 2009.
- \* FED-ED - California began paying benefits May 2009, payments retroactive to February 2009.

\* Data could include multiple counts for the same individual as someone could have exhausted their Regular UI claim in January and then exhausted their
